

# A proficient full stack developer

Hi there, I'm Eddie and I can develop anything web related.

- My projects
- Resume

Over 549 commits the last year

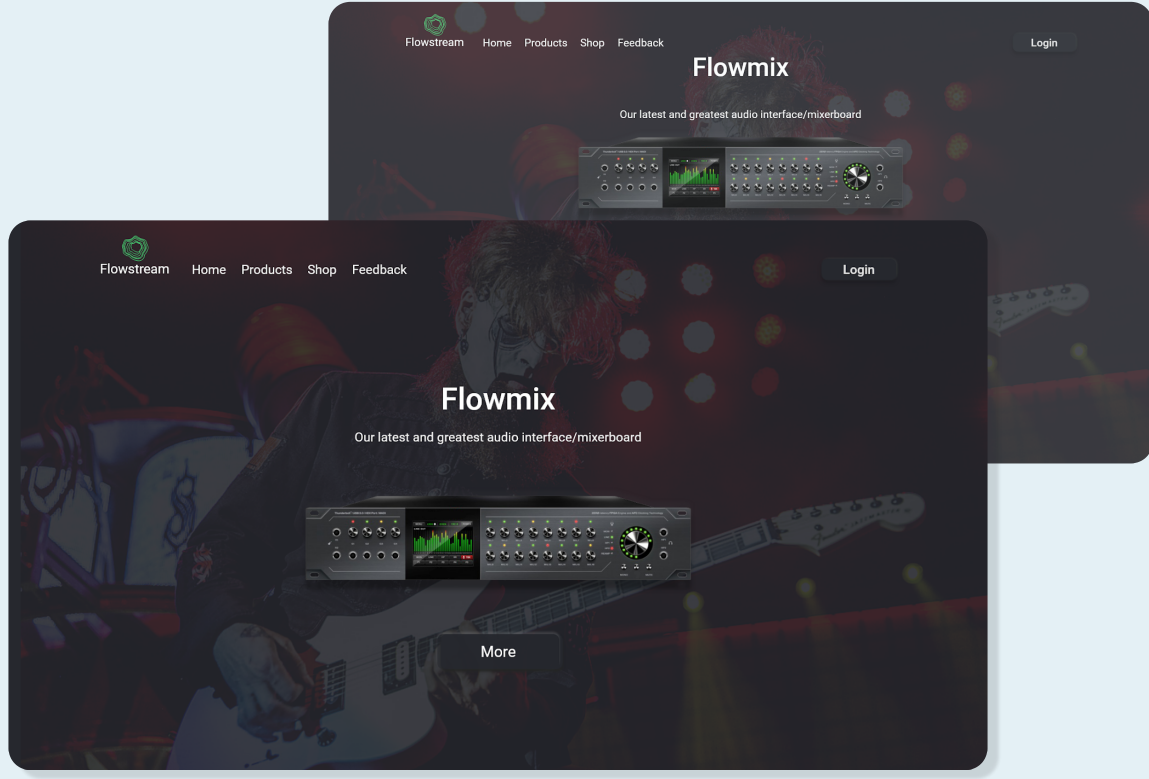

## About me

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Bibendum est ultricies integer quis. Iaculis urna id volutpat lacus laoreet. Mauris vitae ultricies leo integer malesuada. Ac odio tempor orci dapibus ultrices in. Egestas diam in arcu cursus euismod. Dictum fusce ut placerat orci nulla. Tincidunt ornare massa eget egestas purus viverra accumsan in nisl. Tempor id eu nisl nunc mi ipsum faucibus. Fusce id velit ut tortor pretium. Massa ultricies mi quis hendrerit dolor magna eget

### Flowstream

A school project where the teacher was the client and created an imaginary product and company. From this I was asked to create a full stack website written in React as frontend and an Express based backend API to handle the users and other data forms on the site.

### Thesis: Linux vs Windows

My thesis (gymnasiearbete) about performance differences between Manjaro Linux and Windows 10. The analysis details differences between the two operating systems and their differences. Further into the analysis the two operating systems are benchmarked and analysed with a program written in Rust.

## Other projects I've worked on

### Cache api

A caching GraphQL/Express Api that fetches from reddit and returns a single post to the client. This api is very efficient and makes working with content based applications a breeze because all you need is one GET request to it.

Learn more

### CourseBot

Coursebot is a Discord bot written in Typescript with te Discord.js library and the Discord Akairo framework. The bot was created to ease the workflow for moderators on different Discord guilds. It can do anything moderating related and more!

Learn more

### Api client

To make fetching from my cache api even easier, I've made an Typescript based npm module that anyone can use. It can get anything from my cache api and it's also configurable so that in case you're selfhosting the cache api you can point there.
